Interactive Display Meeting Room for Bank Mandiri IT Infrastructure Division Indonesia

Product: VC-B11U

PT Bank Mandiri (Persero) Tbk or Bank Mandiri, headquartered in Jakarta, is the largest bank in Indonesia in terms of assets, loans and deposits. As of December 2020, the bank had 2,511 branches spread across three different time zones in Indonesia and 7 branches abroad, about 13,217 Automatic Teller Machines (ATMs), and five principal subsidiaries.

The client wanted to have an interactive meeting room that can accommodate for online and offline meeting in IT Infrastructure Division.

"After seeing multiple demos of different USB camera brand, Lumens product were finalized considering the product quality of the camera along with auto framing feature and easy of operation via simple remote."

Mr. Pras, IT Infra Manager of Bank Mandiri

Conference room in TPlus head office

Russia

Product: VC-A61P

T Plus Group is the largest Russian private company operating in the field of electricity and heat supply. T Plus Group owns 6% of the installed capacity of Russian power plants. The company provides stable and uninterrupted power supply in 16 regions of Russia.

Upgrading the meeting and conference room with modern multimedia equipment for meetings with regional branches and partners has become a necessity.

The purpose of the modernization was to create a multifunctional meeting room for conferences with the possibility of active participation of each of those present both indoors and remotely. There are a large number of monitors, PTZ video cameras and a congress system in this room.

During negotiations, the cameras are automatically turn to the speaking person, who can be seen on monitors located around the perimeter of the room. Meeting participants attending remotely are also visible to everyone.

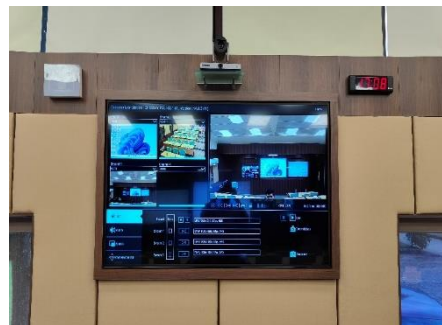

“The meeting room has become more functional. Automatic cameras management by using a congress system and presets makes it possible to hold meetings in a completely autonomous manner, without the participation of technical personnel. After the upgrading we can use old conference codec with new equipment and better visualization. New management system gave us opportunities we haven’t before. An excellent image quality and comfortable workspace are necessary for successful work” — Jul., 2019

Joom, Russia

Product: VC-A50P

The main pride of the office is the conference room. The atmosphere of the loft cinema intersects here with the best modern technology. Yamaha audio system, Draper Targa motorized projection screen, Maxell 3LCD laser projector. All systems are managed by ATEN controller. Lumens camera can follow a speaker's moving. The training is constantly transmitted by Internet for the distant learning.

Some of more than 15 meeting rooms with multimedia systems have Lumens camera for video conferencing

I can confidently say that this project included all aspects, tasks and solutions of office design. But this is exactly what the office of the future should be. The freedom of movement and choice we have created in this office increases employee motivation and mood. The Joom office is a space where you want to return, and its visual and functional diversity will not have time to get bored for a very, very long time. This is the kind of place you can live in while working.

Chief Architect of the project

Western Virginia STEM Building USA

Product: VC-A70H

Virginia Western's new STEM Building is 27 classroom facility that supports a multitude of emerging technologies such as robotics, biotechnology, and mechatronics.

VC-A70H cameras are used to support lecture capture and video conferencing software such as Zoom, Panopto, and Canvas Studio.

Paired with a Crestron DMPS3-350-C control system, instructors are able to seamlessly incorporate video into their distance courses. The HDBaseT interface allows for easy Crestron integration via their DigitalMedia platform.

"Lumens VC-A70H 4K camera was chosen for its exceptional quality and support. We made the switch to Lumens cameras several years ago and never looked back. In a side by side demonstration, the instructor satisfaction made the VC-A70H the only choice for our new STEM building."
