</table>
Chapter 2  System Connection and Application

2.1 System Connection

- POE + Router
- Network cable
- Microphone System
- Network cable
- USB cable
- Camera
- Camera

PC (with CamConnect installed)

2.2 Scenario

Lumens
Chapter 3  Support Devices

3.1 Shure Microphone System
- Shure MXA310 Table Array Microphone
- Shure MXA910 Ceiling Array Microphone
- Shure MXA920 Ceiling Array Microphone

3.2 Sennheiser Microphone System
- Sennheiser TeamConnect Ceiling 2 (TCC2) Ceiling Microphone

<<Note>> When using TCC2 with CamConnect, please set and configure the channels on the Sennheiser Control Cockpit software first.

CamConnect is divided into 8 equal parts according to Senheisser’s horizontal angle of view. They correspond to CamConnect Array Azimuth 1 to 8.

If the forbidden area is enabled on the Sennheiser Control Cockpit software, the corresponding position of CamConnect will also be affected. Example: If the forbidden area is set to 0° to 60°, the audio signal from 0° to 45° of CamConnect Array Azimuth 1 and 45° to 60° of Array Azimuth 2 will be ignored.
### Chapter 4  Operation Interface Description

#### 4.1 Main Screen

<table>
<thead>
<tr>
<th>No</th>
<th>Item</th>
<th>Function Descriptions</th>
</tr>
</thead>
</table>
| 1  | Microphone Device  | 1.1 Support Device: The following brands and models are supported  
  • Shure: MXA910  MXA920  MXA310  
  • Sennheiser: TCC2  
  1.2 Device IP: IP location of the microphone device  
  1.3 Link: On/Off  
| 2  | Preset setting     | After the microphone device is connected, the camera can be controlled to turn to the corresponding position according to the microphone detection position. There will be a green light at the front of the detection position.  
  • Array POS: For Shure microphones  
  • Array Azimuth: For Sennheiser microphones  
  Click the camera preset and modify Sennheiser microphone Array Azimuths manually. Then click [Apply] when completed.  
| 3  | Searching          | The connected USB cameras will be displayed  
  3.1 When disconnected, click [Link] to connect the camera and perform PTZ control.  
| 4  | PTZ Control        | Click to enable PTZ control  
  Refer to [4.2 PTZ Control](#) for function description  
| 5  | About              | Displaying software version information  
  For technical support, please scan the QRcode on the page for assistance  

---

[4.2 PTZ Control](#): Click to enable PTZ control.

# Chapter 5 Troubleshooting

This chapter describes problems you may encounter while using Lumens CamConnect. If you have questions, please refer to related chapters and follow all the suggested solutions. If the problem still occurred, please contact your distributor or the service center.

<table>
<thead>
<tr>
<th>NO</th>
<th>Problems</th>
<th>Solutions</th>
</tr>
</thead>
</table>
| 1. | Unable to search camera devices | 1. Check the power supply of camera or PoE power supply is stable.  
2. Make sure the PC is connected to the camera with the USB cable  
3. Replace the cables and make sure they are not faulty |
| 2. | No response from the microphone detection position | Make sure the microphone device is connected (Link) |
| 3. | When using with a Sennhesier microphone, no response at the specific angle | 1. Make sure the Array Azimuth settings in the CamConnect software include that angle position  
2. Make sure if the angle is set as the forbidden area on Sennhesier Control Cockpit software. Refer to [3.2 Sennhesier Microphone System](#) for details. |
