G20 Japan

Product: VC-A50P、VS-KB30

G20 is an international forum of 19 countries and EU that together represent 90% of world economy. 2019 G20 Summit was held in Osaka, Japan.

PTZ IP Cameras VC-A50P paired with IP Camera Controller are used to capture speakers and then broadcast and live streaming to facilitate language interpretation.

Bosch DICENTIS, the world first IP-based conference system built on the OMNEO, together with Lumens IP Cameras VC-A50P that providing live feeds orchestra the international summit conference solution.

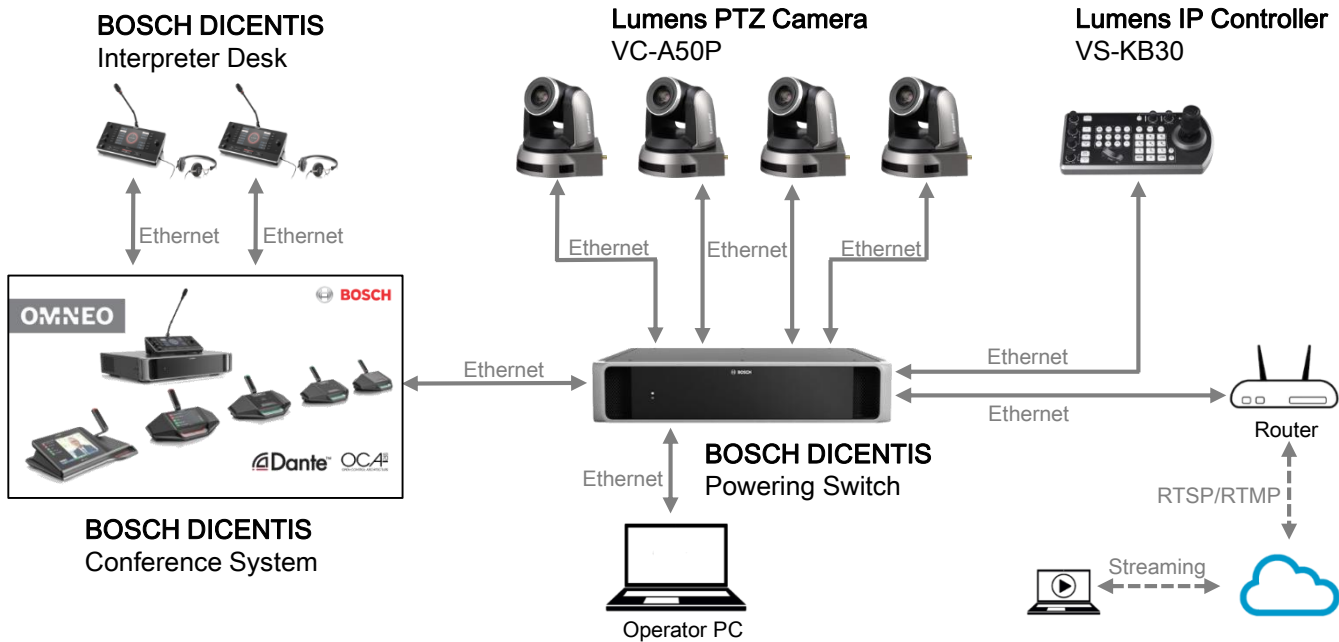

“Lumens VC-A50P PTZ camera was chosen due to its outstanding capability. The cameras were easy to install, supports PoE for long distance image/sound transmission and offers a nice image quality. The newly released IP camera controller also satisfies the need of control in order to broadcast the videos.”

Hideki Utsugi
Manager of Network Solution Business Unit, MTC Japan

Police of Limburg Belgium

Product: VC-BC701P

The police are using remote working stations where people can dial in from a remote location instead of being the police station in person.

The Lumens box camera is used to scan the ID card and documents.

Integrating with the VC software of Teleportel, the box camera can take high-resolution snapshots and transmit to the police officer through RTSP protocol. This all without storing these files on the far side to protect the privacy of the customer.

"This is the solution we need. We can now help a lot more people at a time that is better for them"

Police of Limburg
