# Chapter 1 Safety Instructions

Always follow these safety instructions when using the product:

## 1 Operation

- 1.1 Please use the product in the recommended operating environment, away from water or source of heat.
- 1.2 Do not place the product in tilted position or unstable trolley, stand or table.
- 1.3 Please clean the dust on the power plug prior to usage. Do not insert the product's power plug into a multiplug to prevent sparks or a fire.
- 1.4 Do not block the slots and openings in the case of the product. They provide ventilation and prevent the product from overheating.
- 1.5 Do not open or remove covers, otherwise it may expose you to dangerous voltages and other hazards. Refer all servicing to licensed service personnel.
- 1.6 Unplug the product from the wall outlet and refer servicing to licensed service personnel when the following situations happen:
  - If the power cords are damaged or frayed.
  - If liquid is spilled into the product or the product has been exposed to rain or water.

## 2 Installation

- 2.1 For security considerations, please make sure the standard hanging rack you bought is in line with UL or CE safety approbations and installed by technician personnel approved by agents.

## 3 Storage

- 3.1 Do not place the product where the cord can be stepped on as this may result in fraying or damage to the lead or the plug.
- 3.2 Unplug the product during thunderstorms or if it is not going to be used for an extended period.
- 3.3 Do not place the product or accessories on top of vibrating equipment or heated objects.

## 4 Cleaning

- 4.1 Disconnect all the cables prior to cleaning and wipe the surface with a dry cloth. Do not use alcohol or volatile solvents for cleaning.

## 5 Batteries (for products or accessories with batteries)

- 5.1 When replacing batteries, please only use similar or the same type of batteries.
- 5.2 When disposing of batteries or products, please adhere to the relevant instructions in your country or region for disposing of batteries or products.

3.3.1 Tally Lamp function may be enabled through the control of RS-232 command. Please refer to RS-232 command set document

# Chapter 4 Instruction for installation

## 4.1 Camera dimension

### 4.1.1.1 Camera front view and side view

- Lengthx width x height: 232 x 188 x 189 mm
- Weight: 3.0Kg (excluding the metal plate)

### 4.1.1.2 Camera base

The camera base has tripod mount lock holes and can be installed on the tripod deck of a standard specification 1/4"-20 UNC.

## 4.2 Preparation before installation

Installation and connection of the HD camera requires special skills. To install by yourself, please follow necessary steps, ensure steady and tight installation of the device, and pay attention to your safety to avoid any accident.

- 4.2.1 Ensure the safety of the installation environment. Please do not install the device on unstable ceiling or in a place where the device is in danger of falling to avoid any accident.
- 4.2.2 Please check whether accessories in the box are complete or not. Please contact the supplier for any shortage, and make sure to keep the accessories in the box intact.
- 4.2.3 Please choose a proper place for installation of camera in advance. Please determine an installation place according to the following requirements
  - 4.1.1.1 Confirm the position for the object to be captured.
  - 4.1.1.2 Confirm whether the camera is set at a proper distance from other light sources.

## 4.3 Instruction for installation

### 4.3.1 I would like to install camera on the desk

#### 4.3.1.1 Precautions for installation

- ◆ Please install the machine on a flat desk
- ◆ Do not grab the camera head by hand when handling the device
- ◆ Do not rotate the camera head by hand. Improper rotation may result in breakdown of the camera

#### 4.3.1.2 Installation steps

1. Place the camera on a flat desk directly to ensure the normal vertical and horizontal operation of the machine

### 4.3.2 I would like to install the camera on the ceiling

#### 4.3.2.1 Prepare for the parts and equipment required during the installation

1. Accessories in the box (metal plates A, B, M3 screw silver x 8, black x 2)
2. Screw for locking on ceiling mounted hanger x 4
3. Drilling machine, screw driver, ladder

Metal plate B - ceiling side

#### 4.3.2.3 Precautions for installation

1. Before installation, please confirm the orientation of the machine relative to the object to be captured
2. It is recommended that the machine should be set at a distance of more than 2 meter away from the object to be captured. Please adjust for a best distance according to the magnification of the lens

3. The machine (including metal plates) is weighed at about **3 kg**. If it is to be installed on the ceiling, please use the hanger that has obtained UL security approval to prevent the machine from falling down.
4. Please check whether the camera is installed securely on a regular basis.
5. Please clean the cooling fan located at the bottom to ensure the good heat dissipation effect of the machine on a regular basis.

#### 4.3.2.4 Installation steps

1. Remove 4 pieces of foot pads on the bottom of the camera by rotating the foot pads counterclockwise.

**<Remark>** Please keep the foot pads properly after removal and store them for future use.

2. Fix the metal plate A on the machine base with 4 M3 silver screws

3. Lock the metal plate B on ceiling mounted hanger

**<Caution>:**

- (1) Please use the hanger that has obtained UL security approval
- (2) Please reserve the hole for the connecting wires of the camera

4. Combine the metal plate A and the metal plate B

- (1) Push the metal plate A up to the ceiling and then to the right to latch the metal plate B
- (2) And then secure with 2 M3 silver screws and 1 M3 black screw

#### 4.3.2.5 How to remove

1. Remove the connecting wires from the camera
2. Uninstall the camera together with the ceiling, loosen the three screws that fix the metal plates A and B and push to the left to remove the machine
3. Then remove the screws on the hanger and the machine

### 4.4 Connecting devices

#### 4.4.1 Connecting RS-232

With RS-232 in/out, at most 7 Lumens cameras can be connected.

# Chapter 6 Network Function Settings Description

## 6.1 Connecting Camera to Network

### 6.1.1 Connecting to Internet

Two common connection methods are shown below

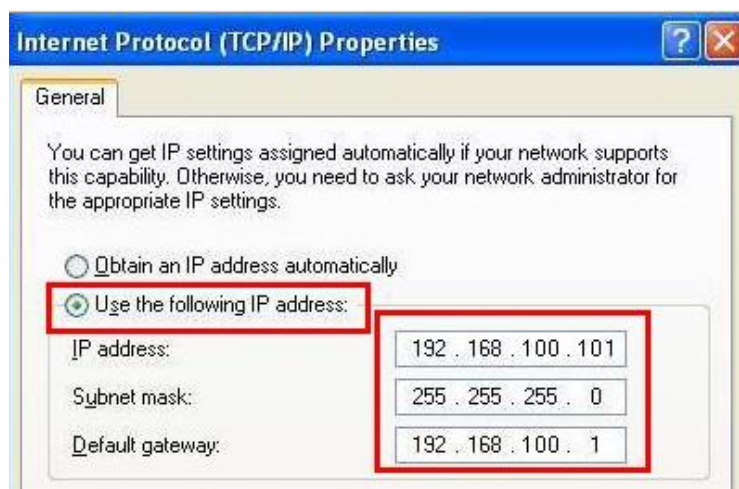

1. Connecting via switch or router

2. To connect directly through network cable, the IP address of the computer should be changed so that it is on the same network segment as the camera  
**e.g.:** The factory-preset default IP address of camera is 192.168.100.100. The computer IP address must be set with the same network segment, such as 192.168.100.101, so that the computer can be connected correctly with the camera

- Change network settings

### 6.1.2 Using the Browser to View the Images

- Open the browser, and enter the URL of camera in the IP address bar  
e.g.: <http://192.168.100.100> (default IP address)
- Enter administrator's account and password  
\*For the first login, please refer to [6.2.3 Account Management](#) to change the default password

Lumens Network Camera	
●	Account: admin
●	Password: 9999

### 6.1.3 Using Lumens VMS Software to View the Images

<Remark> For VC-A71PN, to support this function, please turn off NDI|HX (Please refer to [6.2.5 Setting-Video](#))

- Open **LUMENS VMS** software (Please download from the Lumens official website)
- Search for the camera: Press  [automatically search for the device] button to locate the VC-A71P camera
- Click the camera in the list and start operation after connecting to network

<Caution> When using automatic search, the camera and computer must be in the same network segment, e.g.: 192.168.4.X

## 6.1.4 Using RTSP Player to View the Images

**<Remark>** For VC-A71PN, to support this function, please turn off NDI|HX (Please refer to [6.2.5 Setting-Video](#))

In addition to the browser and VMS, other free softwares also can be used for RTSP connection, such as VLC, Quick Time and PotPlayer

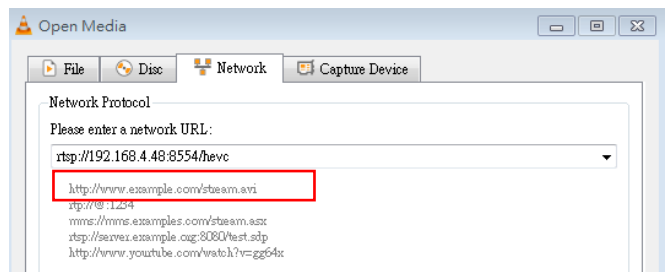

RTSP connection address formats are as follows:

- RTSP Streaming 1 (4K@H.265) => rtsp://[camera IP:8554/hevc](#)
- RTSP Streaming 2 (1080P@H.264) => rtsp://[camera IP:8557/h264](#)
- RTSP Streaming 3 (720P@H.264) => rtsp://[camera IP:8556/h264](#)

For password authentication, the RTSP connection address is as follows:

- RTSP Streaming 1  
[rtsp://Username:Password@VC IP address:port/hevc](#)
- RTSP Streaming 2/ 3  
[rtsp://Username:Password@VC IP address:port/h264](#)
- To enable password authentication, please refer to [6.2.9 Setting - Network](#)

Example: Open VLC software, click [**Open Network Stream**], and enter a URL:  
rtsp://192.168.4.48:8554/hevc

## 6.1.5 Using NDI Studio Monitor to View the Images

**<Remark>** Only VC-A71PN is available. Support when NDI|HX is on (Please refer to [6.2.5 Setting - Video](#))

For NewTek product operation or instructions, please visit the website:

<https://www.newtek.com/>.

To download NDI 4 Tool, click the link: <http://new.tk/NDIHX-Driver-Win>

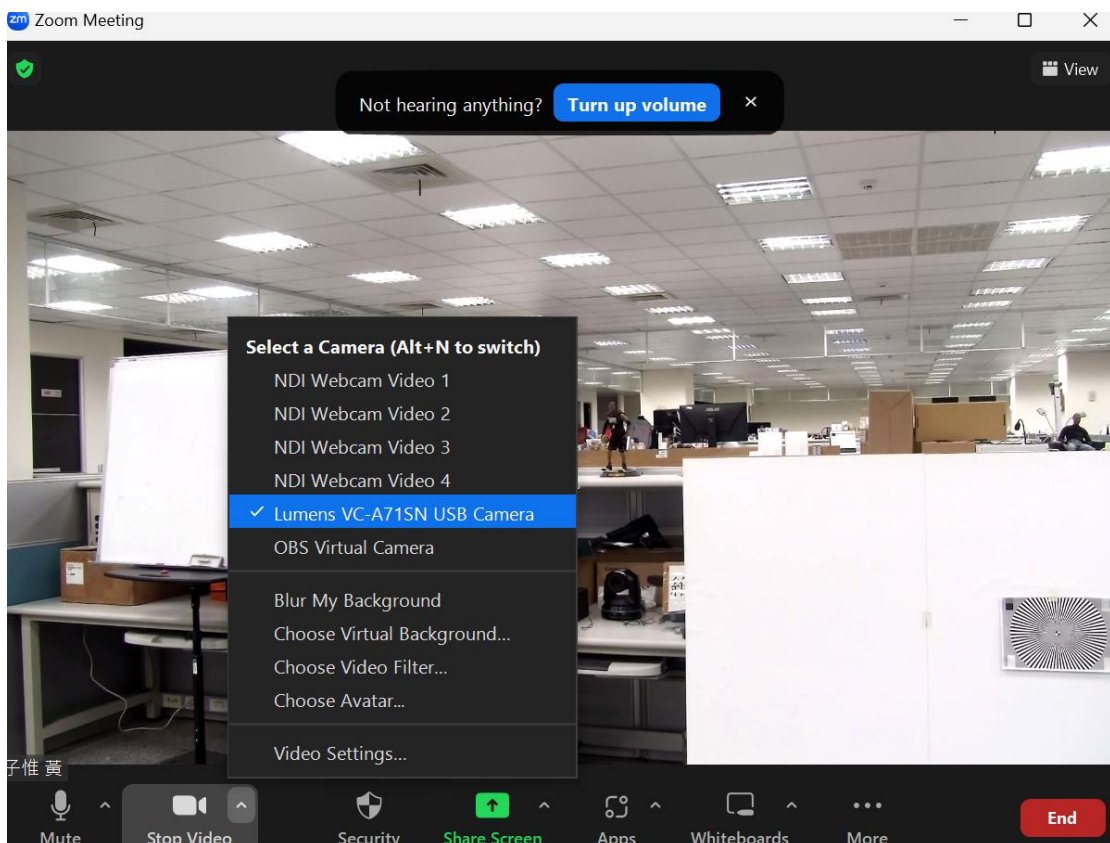

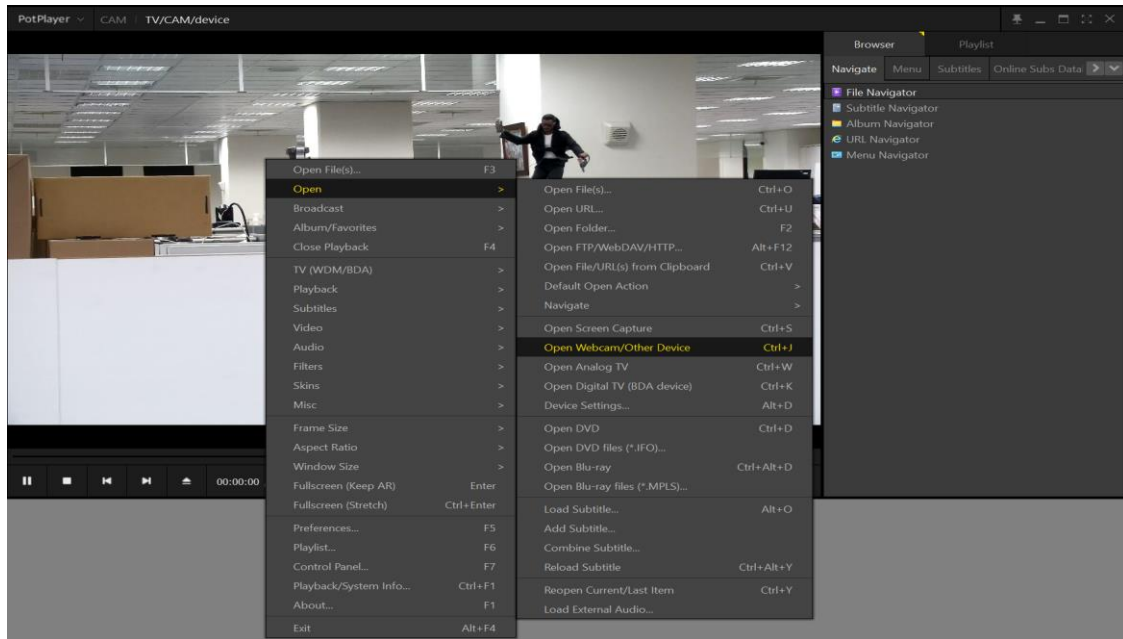

## 6.1.6 Using USB to View the Images

**<Remark>** When using 4K resolution for USB output, the video is encoded in H.264 format, while resolutions of 1080P and below are encoded in either H.264 or MJPEG format (the media player will choose automatically). However, some media players or

conference meeting apps may not display images when using 4K resolution due to conflicts between the A71P H.264 format and the software itself. In that case, please lower the resolution to 1080P.

To utilize the USB camera source, launch a media player like PotPlayer or a conference meeting app such as Zoom, then select the camera source.
