

**New Solution**

VoiceConnect

Technical Breakthroughs & Innovations

VoiceConnect V2.0 eliminates the need for expensive external hardware processors. By utilizing the OIP-N bridge to seamlessly integrate and synchronize multiple VC-TR60A cameras, the system achieves highly precise, multi-angle voice-activated camera tracking across large spaces.

Newly Added Features

1

Preset Free

Requires zero preset coordinates configuration. It supports the integration of up to 3 individual VC-TR60A tracking cameras.

2

One Cable BYOM (Bring Your Own Meeting)

Leverages the OIP-N bridge's advanced decoding architecture to provide a single-cable USB BYOM plug-and-play experience.

3

Dante AV-H Support

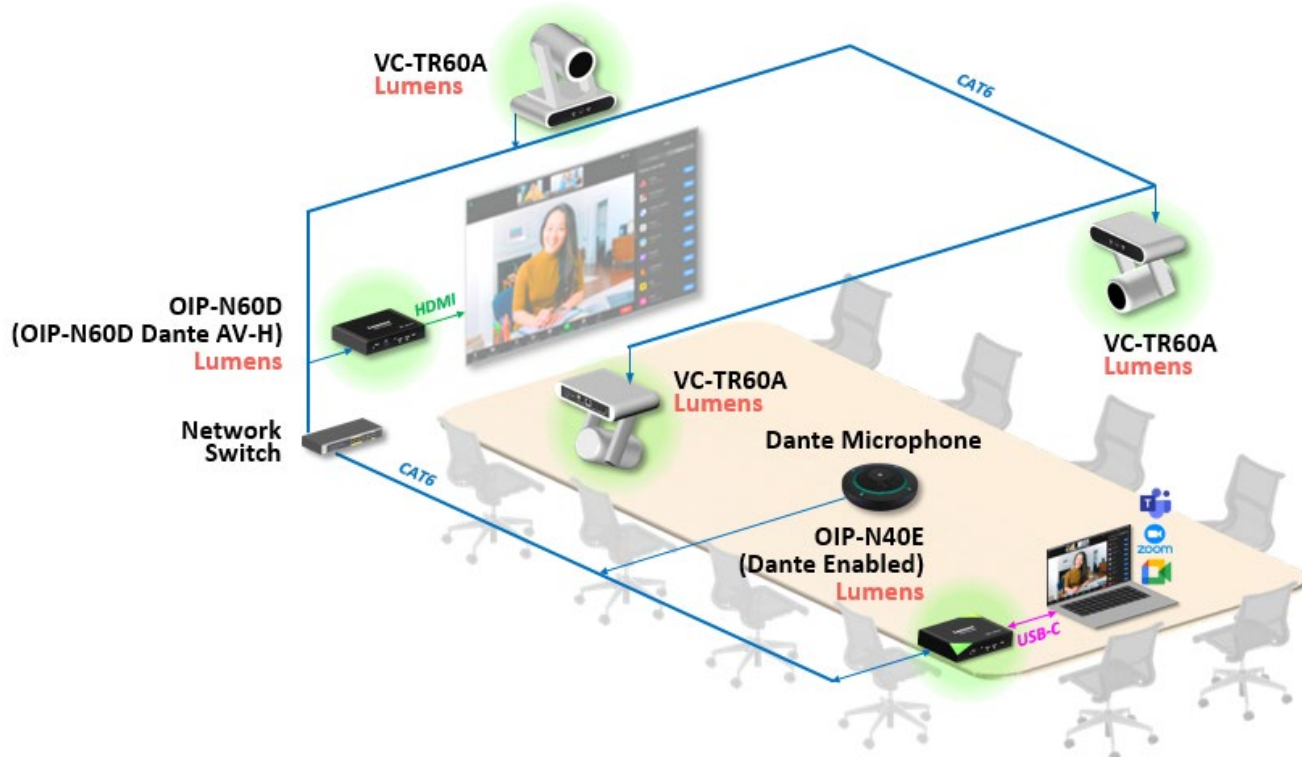

Integrates natively with third-party audio systems that support Dante, providing synchronized audio-video distribution over standard network infrastructure.

4

Microsoft Teams Certified Camera

The VC-TR60A is fully Microsoft Teams certified, ensuring enterprise-grade stability, video quality, and software compatibility.
