Key Features-1

Onboard GUI Director

Live control is incorporated into the device. Connect an HDMI screen to the LC100 to access the intuitive GUI. Sessions can be produced live or scheduled in advance.

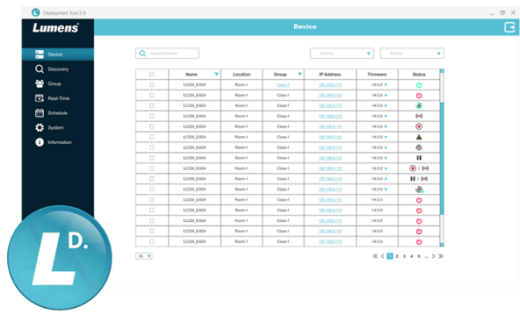

Live Pre-defined Scenes for Switching

Build layout scenes that incorporate a variety of visual elements include split screen video, picture-in-picture, title/logo overlays, and background images. Activate and change layouts with the click of a mouse.

Program & ISO Recording

The LC100 records the mixed program-out video and captures two video inputs with independent audio. This simplifies media archiving and post-production.

Key Features-2

Deployment Tool for Remote Central Management

The Lumens deployment software enables control, management, and administration of multiple LC100 units on the network. Administrators can remotely monitor device status, saving time and reducing costs.

Intermission Scene

Need a break time during the streaming session? Hit the coffee mark to display the break time page. Users can upload their own designed intermission screen

LC-RC01 Remote Control Panel

Accessory

Lumens LC-RC01 remote control panel, a wall plate for the LC100 to control the live streaming, recording, and video file saving options. The panel provides three macro functions that can remotely switch the scene and control the cameras preset. The LC-RC01 can be extended to 30 meters through a Cat 5e cable. Equipped with a USB port, it supports USB flash drives to record or backup video files.

U.S. standard: LC-RC01U

Europe standard: LC-RC01E

*We provide two Standard remote control panels.

How to Control?

LC100 provide below control interface.

1. **Remote control panel:** LC-RC01
2. **Onboard GUI Interface:** Use mouse and keyboard to operate the GUI from Multiview HDMI out.
3. **Online Director:** Webpage
4. **USB or wireless keypad:** one click to record
5. **RS-232, RS-485, TCP/IP control:** Provide command for supporting third-party controller, like Crestron, Extron controllers.

1

Remote Control Panel
LC-RC01

The image shows two white remote control panels. The larger one is the LC-RC01, featuring buttons for BACK, PLAY, and RECORD. A smaller, similar panel is shown next to it.

2

Onboard GUI
with Wireless mouse

The image shows a computer monitor displaying a software interface, a wireless mouse, and the Lumens LC100 device below them, illustrating the onboard GUI control method.

3

Web Online Director

The image shows a computer screen displaying a web-based control interface for the Lumens LC100, with various settings and controls visible.

4

USB Keypad

The image shows a black USB keypad with multiple buttons, used for one-click recording.

5

RS-232
RS-485

The image shows a green terminal block with three ports, labeled RS-232 and RS-485. A circular icon with a computer and network symbol and the text 'TCP/IP' is overlaid on the left.

3 Local Storage Options

How to Backup Data (1)?

You can install your data in the build in 2TB storage, or if the build in 2TB is too small you can exchange to bigger HaerdDisk, or you can add one external USB storage.

Built-in 2TB

Exchange SATA Hard Disk Drive (up to XX TB)

External USB Storage (up to XX TB)

Network Storage

How to Backup Data (2)?

The built-in storage space is limited, and the video files must be uploaded to the network storage space automatically, for the user to backup and manage.

You can backup to **LMS** (learning management systems) like **Panopto**, **Kaltura**, and **OpenCast**.

FTP

You can upload to **NAS** or **FTP/SFTP** server

NAS

Lumens Products

Integration

LC100 is a powerful all-in-one Media Processor with HDMI, SDI, USB, and Ethernet inputs. The various AV inputs make it easier to connect with all ranges of Lumens cameras. LC100 is compatible with Lumens LC-RC01 Remote Control Panel and Lumens Deployment Tool software. It allows you to remotely manage and control LC100 devices.
