Medium-Sized Meeting Room
BYOD Solution For Corporate

Use Case: Medium-Sized Meeting Rooms

BYOD Solution

- Participants: 4~10 people
- Space: >16~25 m²

A conference room for 4 to 8 people is an essential space in the corporate building. Departmental meetings or executive meetings often taken place in medium-sized meeting spaces. These rooms are also suitable for video conferencing with partners, customers or suppliers.

Pain Points in Traditional Meeting Rooms

1. Conference room table get cluttered with cables and adapters.
2. It can take 10 minutes to set up the video conference.
3. BYOD audio quality can be poor, especially in large space and with multiple participants.
4. Cameras, microphones and speakers are connected to the computer by relatively short USB cables.
5. The position of the display cable is fixed, and only one person can connect to the screen at a time.
6. Mobile devices generally cannot share screens.

Solution Features

Perfect audio performance:

- **Beamforming Microphones:**

The Lumens MS-10 features an array of 5 directional microphones that have echo cancellation and noise suppression to capture every participant's voice clearly.

- **Professional Loudspeaker:**

Lumens MS-10 includes a passive diaphragm loudspeaker design to enhance human voices. Distortion is very well controlled at higher volumes. The speaker is ideal for medium-size meeting rooms, providing clear and natural voice communications.

Hybrid Meeting Space:

- **Instant Video Conferencing**

With the [Barco](#) ClickShare Wireless Conference, you start a video conference with a single click.

- **More Constructive Meetings**

Enjoy interactive screen sharing to enhance discussions.

- **Sharing without Restriction**

Share your screen and switch to colleagues' screens at your leisure.

Solution Features

Clutter-free Meeting Rooms:

- **Bring Your Own Device**

Plug the USB ClickShare Button into your laptop for instant on-screen projection, with no need no need for another cabling.

- **Wireless Connection**

[Barco](#) ClickShare connects wirelessly with your laptop and a wide range of audio-visual peripherals.

- **Worry-free Interface and Cabling**

A wireless connection replaces long cables and keeps the meeting room looking professional.

Capture Everyone with Ease:

- **Intelligent Auto Framing**

The MS-10's auto-framing immediately detects all participants. It dynamically adjusts its frame to include each delegate, re-framing the view if participants join or leave during the meeting.

- **Wide angle view**

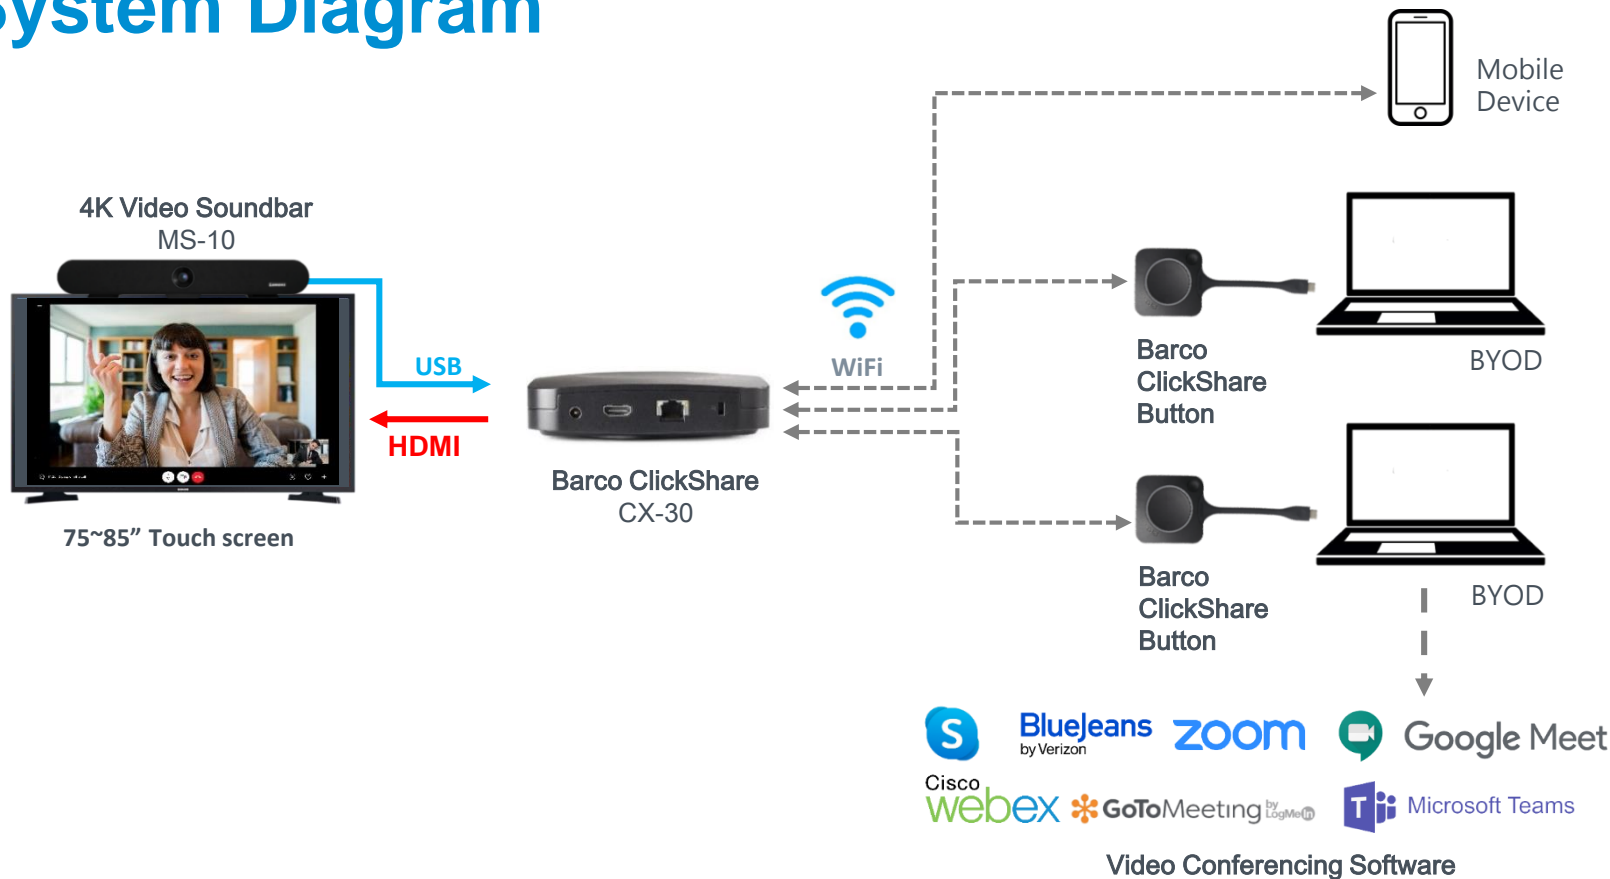

120° viewing angle is ideal for small meeting spaces, allowing all attendees to be included.
