Use Case: Small Meeting Rooms

BYOD Solution

- **Participants:** 2~4 people
- **Space:** <15 m²

With organizations preferring smaller, more focused meetings of 2 to 4 people, compact meeting spaces are increasingly being installed. Employees can use this space flexibly, whether for project meetings with remote co-workers or video conferences with customers.

**AV Concerns**
1. Managing multiple HDMI, USB and Ethernet cables can be messy and unnecessarily complex.
2. It can be difficult to add more than one laptop to a meeting.
3. A laptop's built-in camera is not designed to capture multiple people around a table.
4. Most ‘pro’ webcams deliver a very wide view, even when the room is half-occupied.
Solution Features

• Single Cable Connection
  Plug the USB ClickShare Button into your laptop for instant on-screen projection.

• Wireless Connection
  Barco ClickShare connects wirelessly with your laptop and a wide range of audio-visual peripherals.

• Instant Video Conference
  With the Barco ClickShare Wireless Conference, you start a video conference with one click.

• Constructive Meetings
  Enjoy interactive screen sharing to enhance discussions.

• Clutter-free Meeting Room
  A wireless connection replaces long cables and keeps the meeting room looking professional.

• Intelligent Auto Framing
  The VC-B11U's auto-framing immediately detects participants in a room. It dynamically adjusts its frame to include all delegates, re-framing the view if participants join or leave during the meeting.

• Wide angle view
  120° viewing angle is ideal for small meeting spaces, allowing all attendees to be photographed.
Product Selection

• Wireless Presentation System
  – Barco ClickShare CX20
  – Barco ClickShare button x1

• Video Conference Camera
  – Lumens VC-B2U
  – Lumens VC-B11U

• Speakerphone
  – SENNHEISER EPOS Expand SP20

• Display
  – 46~55”display
