OIP-A60C

AV over IP Controller

• INTRODUCTION

The OIP-A60C Controller centrally manages and controls AV over IP encoders and decoders through a unified interface.

It supports automatic device discovery, flexible system configuration, and integration with third-party control systems, simplifying AV operations and reducing setup time. Ideal for meeting rooms, classrooms, auditoriums, and large-scale AV installations requiring centralized system management.

• KEY FEATURES

- Simplifies system setup with automatic discovery of connected encoders and decoders, reducing manual configuration and installation time.
- Enables flexible system connectivity with dual Ethernet ports and RS-232 support for network management and external control.
- Simplifies centralized AV management through Web UI, Telnet, RS-232, and integration with third-party control systems.
