Lumens Launches the New DC-F20 HD/2K USB Document Camera

The pocket-sized document camera

Hsinchu, Taiwan, June 23, 2022 – Lumens® Digital Optics Inc., today announced the DC-F20 HD/2K USB document camera. It is a foldable, portable, and lightweight demonstration tool which is ideal for teachers and presenters. DC-F20 delivers vivid and colorful images with video output of 1080p resolution and higher (up-to 2K).

The DC-F20 can also connect to remote guests using popular conferencing platforms, such as Zoom, Meet, Skype, or Teams. With the included Ladibug software, users can easily position and zoom the lens position, apply on-screen annotation, and highlight parts of the document.

Steven Liang, VP of Product Development for Lumens, commented: “Teachers are increasingly asked to engage with students who are located both in the classroom and at home. They are also required to prepare digital learning resources in advance of lessons, and to teach from remote locations. A tool like the DC-F20 is perfect, being highly portable, easy to use and offering dual functionality – document camera and webcam.”

This level of flexibility makes the device equally appealing to business professionals and presenters who need the flexibility offered by portable presentation technology and collaboration tools. With a quality lens and a built-in variable illumination LED light, DC-F20 can be used in any environment.

Lumens DC-F20 benefits from simple USB plug and play operation, and supports Windows, Mac and Chrome OS computers.
