OIP-N60D Firmware Release Note

Release Date	Version	Description	Note
2025/03/06	OIB116	**New Features** 1. Virtual USB now supports resolution changes. 2. Resolution changes are now allowed in Extender Mode. 3. Talkback function is now supported. 4. Turning off UAC is now allowed in Virtual USB. 5. 802.1x is now supported. 6. CEC function has been added. 7. RTSP now supports the UDP protocol. **Improvements** 1. Sources can now be switched using the Menu button on the unit. 2. Added different authentication modes for customers who cannot use Digest authentication. 3. A "Full NDI not supported" message will now appear when the unsupported NDI sources are detected. **Bug Fixes** 1. Increased the displayed quantity limit in the search list to 256. 2. Fixed a bug where the IP address would sometimes change when DHCP is off.	Please note that the N60D(OIB116) must work with the N40E (OIA116). Cross-firmware usage should be avoided.
