# Chapter 5 Network Function Settings Description

## 5.1 Connecting Camera to Network

### 5.1.1 Connecting to Internet

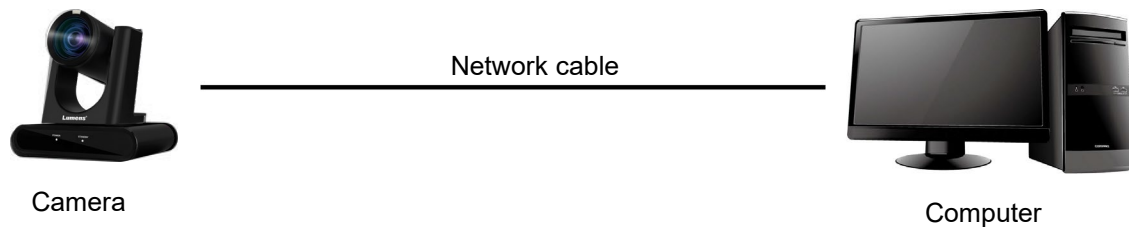

Two common connection methods are shown below

1. Connecting via switch or router

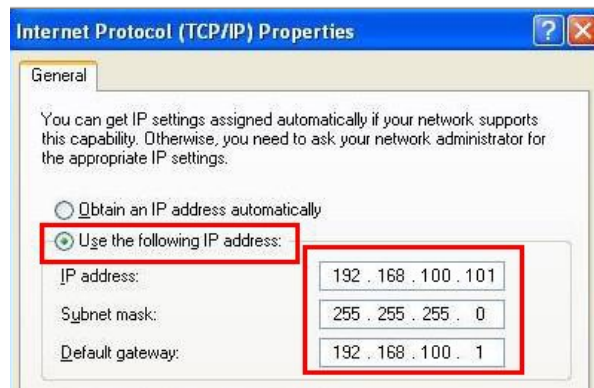

2. To connect directly through network cable, the IP address of the computer should be changed so that it is on the same network segment as the camera

**E.g.:** The factory-preset default IP address of the camera is 192.168.100.100. The computer IP address must be set with the same network segment, such as 192.168.100.101, so that the computer can be connected correctly with the camera

- Change network settings

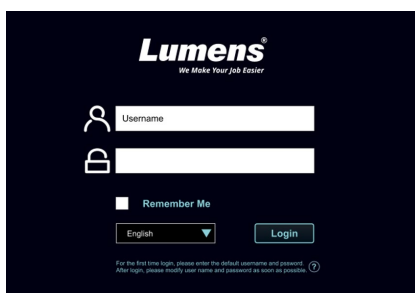

### 5.1.2 Using the Browser to View the Images

- Open the browser, and enter the IP address of the camera in the address bar

E.g.: <http://192.168.100.100> (default IP address)

- Enter administrator's account and password

**<Remark>** For the first-time login, please refer to [5.2.10 System Settings - User](#) to change the default password

Lumens Network Camera

- Account: admin
- Password: 9999 (Default)

### 5.1.3 Using RTSP Player to View the Images

RTSP connections can be made using free software, e.g.: VLC, Quick Time, PotPlayer, etc.

RTSP connection address formats are as follows:

- RTSP Stream 1 => <rtsp://camera IP:8557/stream1>
- RTSP Stream 2 => <rtsp://camera IP:8557/stream2>

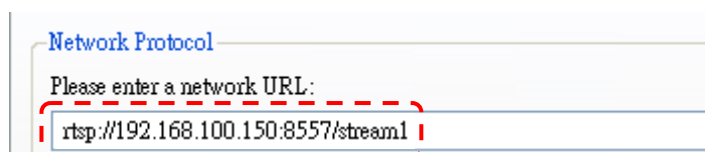

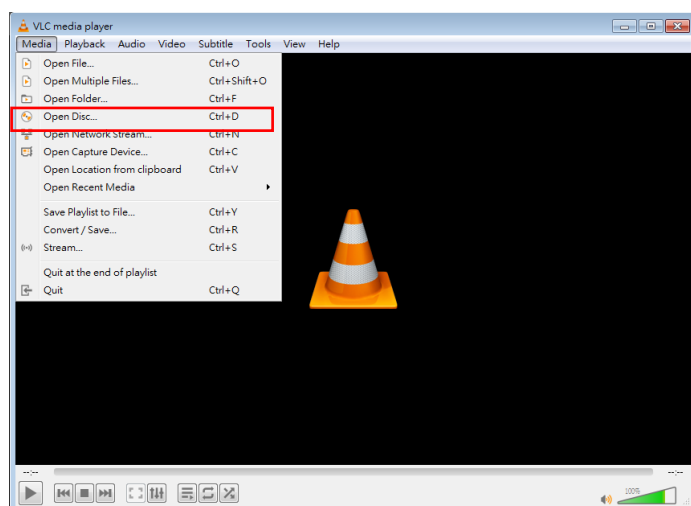

If password authentication is enabled, the RTSP connection address is as follows:

- [rtsp://Username:Password@VC IP address:8557/stream1 \(or stream2\)](rtsp://Username:Password@VC IP address:8557/stream1 (or stream2))
- To enable password authentication function, please refer to [5.2.8 System Setting - Network](#)

#### Example:

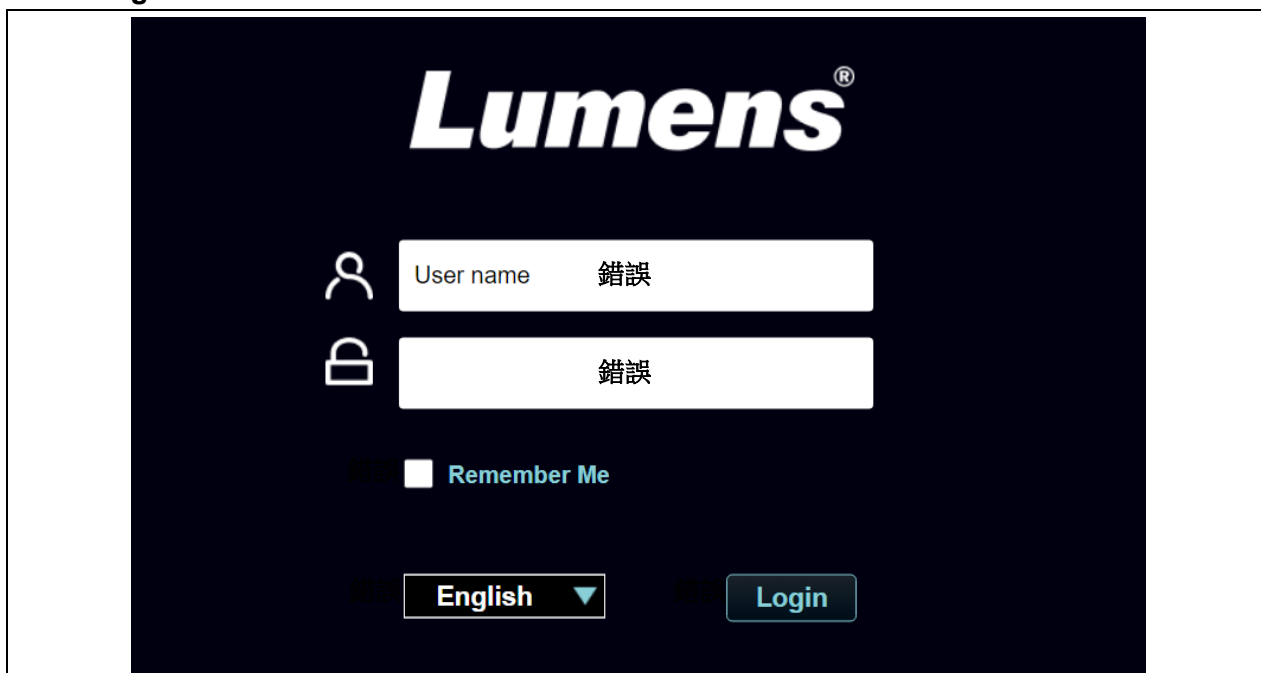

Open the VLC software, click [Open Network Streaming], and enter the URL:

<rtsp://192.168.100.150:8557/stream1>

## Chapter 6 Troubleshooting

This chapter describes problems you may encounter while using VC-TR60. If you have questions, please refer to related chapters and follow all the suggested solutions. If the problem still occurred, please contact your distributors or the service center.

No.	Problems	Solutions
1.	<b>Boot without power signal</b>	1. Make sure you have plugged in the power cord. 2. When using a PoE connection, ensure that the power supply supports PoE (IEEE802.3at) hubs
2.	<b>There is no image output from camera</b>	1. Check the power supply or PoE supply functions. 2. Confirm the output signals are in streaming output. 3. Confirm whether the camera resolution can be used together with the monitor equipment 4. Replace the cables and make sure they are not faulty.
3.	<b>Camera image is severely delayed</b>	Please use 1080p or 720p 60/50 fps rather than 25/30 fps signals
4.	<b>RS-232 cannot be controlled</b>	1. Confirm the connection is correct (RS-232 In/ Out) 2. Please make sure the VISCA setting is the same as the control equipment
5.	<b>Whether the Internet can be used for operation</b>	Please refer to <a href="#">Chapter 5 Network Function Setting Description</a> for the Internet usage
6.	<b>The ONVIF software cannot find the machine</b>	Please make sure that [System] > [Device] > [Camera ID] / [Camera Location] on the web page uses only English letters or numbers. The ONVIF software cannot find the machine if you use special characters and the space
7.	<b>The camera does not save the relevant parameters (PTZ, AWB...) after reboot</b>	Please make sure if the Initial Position is set to Last Operated Position from the setting menu or web page Setting Menu: [System] > [Initial Position] Web page: [Live Viewer] > [Camera Setting 
8.	<b>How to log in the portal when you forget your account password</b>	Please contact your Lumens distributor or service center

# Chapter 7 Safety Instructions

Always follow these safety instructions when setting up and using VC-TR60:

## 1 Operation

- 1.1 Please use the product in the recommended operating environment, away from water or source of heat.
- 1.2 Do not place the product on a tilted or unstable trolley, stand or table.
- 1.3 Please clean the dust on the power plug prior to usage. Do not insert the product's power plug into a multiplug to prevent sparks or a fire.
- 1.4 Do not block the slots and openings in the case of the product. They provide ventilation and prevent the product from overheating.
- 1.5 Do not open or remove covers, otherwise it may expose you to dangerous voltages and other hazards. Refer all servicing to licensed service personnel.
- 1.6 Unplug the product from the wall outlet and refer servicing to licensed service personnel when the following situations happen:
  - If the USB port becomes damaged or frayed.
  - If liquid is spilled into the product or the product has been exposed to rain or water.

## 2 Installation

- 2.1 For security considerations, please make sure the standard mount you use is in line with UL or CE safety approbations and installed by technician personnel approved by agents.

## 3 Storage

- 3.1 Do not place the product where the cord can be stepped on as this may result in fraying or damage to the lead or the plug.
- 3.2 Unplug this product during thunderstorms or if it is not going to be used for an extended period.
- 3.3 Do not place this product or accessories on top of vibrating equipment or heated objects.

## 4 Cleaning

- 4.1 Disconnect all the cables prior to cleaning and wipe the surface with a dry cloth. Do not use alcohol or volatile solvents for cleaning.

## 5 Batteries (for products or accessories with batteries)

- 5.1 When replacing batteries, please only use similar or the same type of batteries.
- 5.2 When disposing of batteries or products, please adhere to the relevant instructions in your country or region for disposing of batteries or products.
